

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [4] on page 2 with the following new paragraph:

a1 In transmitting technology of multimedia data such as sound and images, a simple image service (SIS) is used when adding ~~the~~ a picture or animation images to the short message. When a short message is transmitted, the attached image files are also transmitted at the same time.

Please replace paragraph [7] on page 3 with the following new paragraph:

a2 The sub-parameters of the teleservice layer are different depending on whether the teleservice layer transmission is sending or receiving the messages. In other words, the teleservice layer includes sub-parameters such as Submit Message when sending and Deliver Message when receiving. However, ~~an~~ a User Data sub-parameter is always used to send the user's final data no matter whether the teleservice layer is sending or receiving the messages. Image data compressed by the SIS are stored and sent through the User Data sub-parameter.
